

SCREW CLAMPS

This screw clamp is for all-purpose use, such as raising and lowering, lateral (horizontal) pulling and turning-over lifting.

FEATURES

- The lightweight and compact clamp can be used for a variety of operations such as lifting, hanging, turning over, and pulling of work pieces.
- A positive clamping force is generated with the screw and the round cams (special spring-loaded) at no load and even when vibrations occur during operation.
- The main body is made by die-forging of special alloy steels in one piece, which is optimally tempered for maximum strength and durability.
- High-frequency quenching of special alloy steels gives greater durability to the cam.
- The main body is a baked-on finish.

⚠ Always lift work pieces at 2 or more points for safety.
